# 1. OPENING THE PARASOL

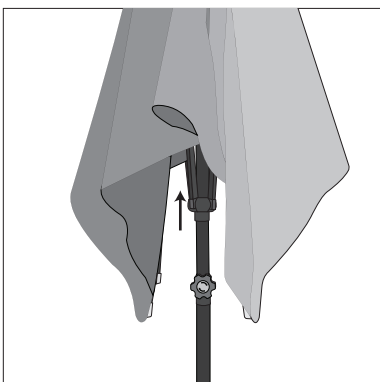

## Step 1

Connect two-section central pole of the parasol by inserting one section into another and tighten it by turning the screw clockwise.

Gently, without using any force, extend the parasol's central ribs in the opposite direction of the position of the central pole.

## Step 2

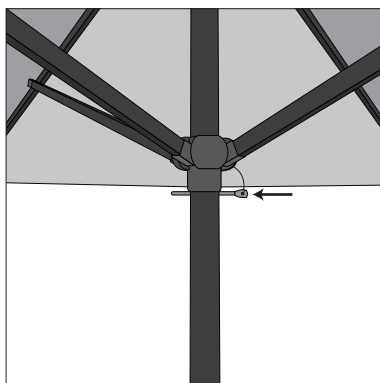

## Step 3

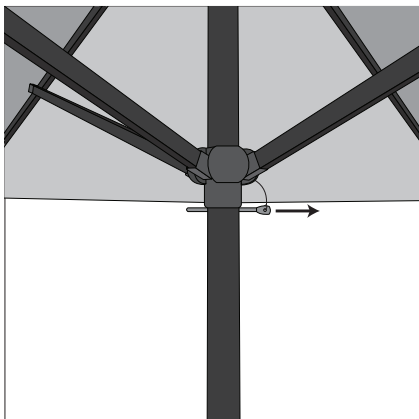

Push the parasol's crown up, until the parasol opens to a desired height.

Secure the parasol by inserting the safety pin into provided hole positioned on the upper end of the central pole.

## Step 4

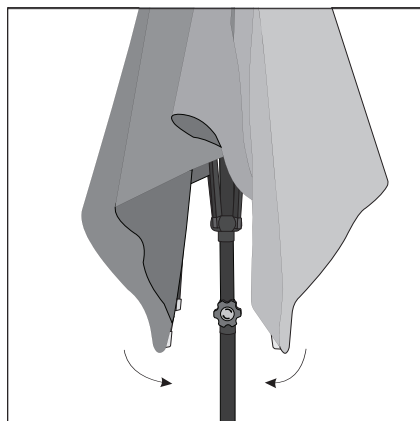

## 2. CLOSING THE PARASOL

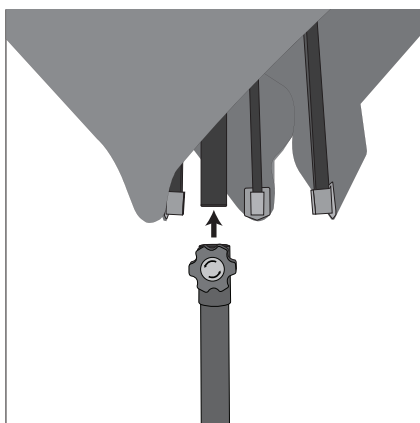

### Step 1

Remove the safety pin while firmly holding parasol's crown.

Gently, without using any force, lean the ribs towards the central pole by lowering the parasol's crown.

### Step 2

### Step 3

Loosen the screw by turning it counterclockwise and disassemble parasol's central pole by pulling up the top part of the parasol.

### 3. NOTICES

#### **IMPORTANT NOTICE!**

Opening and closing the parasol in any way not specified in these instructions is not recommended. While opening and closing the parasol pay attention to persons and objects in the vicinity.

### 4. PROTECTION AND SAFETY

- **DO NOT** open or use parasol in snow, rain or bad weather conditions.
- **DO NOT** use parasol in winds above 7.9 m/s. Using the parasol beyond the above mentioned wind speed is not completely safe and it needs to be closed.
- Parasol must be firmly fixed to the parasol base.
- **ALWAYS USE** sufficient weight and correct dimensions of parasol base declared by manufacturer.
- **DO NOT** hang anything on parasol frame or canvas.
- Always allow the parasol to dry when open and before storage to prevent the formation of mold and discolouration.
- A protective sleeve protects the parasol and will extend its service life.
- Only pull the protective sleeve or store parasol when it is dry.
- Always check the user manual that can be found inside the box when the parasol is delivered.

### 5. WARRANTY

Warranty does not cover any mechanical, abrasive, and chemical abuse or any other damages caused by improper warehousing and distribution, improper cleaning and handling, using parasol during bad weather conditions or similar improper activities that could result in damaging the parasol or parasol cover or any of their parts.
